

Project catalogue

This is an overview of open source mobile application development ideas and projects in progress.

Projects in progress

Spørgetjeneste

Prototyping for app for a danish ask anything service is in progress, expected to be available in end of March 2011. Mobile web and administrative app will most likely also be implemented later on.

Idea catalogue

... todo: fill out, crystalise and elaborate on the ideas from HMDC11 brainstorming session.

Open public access catalogue

Open source implementation of mobile access to library catalogues, targeting both smartphones and feature phones. A demo/prototype is available on demo.solsort.dk (github), but needs to be reimplemented to support the abstraction layer discussed in DBC-status-2011-03.
